Projects

Little Lemon Restaurant | JavaScript, React, Bootstrap, Figma github.com/Elijah647/Little-Lemon-Restaurant

- Designed and developed a restaurant booking system with React, utilizing Formik and Yup for robust form validation
- Created a client-focused restaurant prototype in Figma, aligning layout and branding with their needs
- Ensure functionality and reliability by writing tests with Jest and React Testing Library

ExpTrak | JavaScript, React, Tailwind github.com/Elijah647/ExpTrak

- Designed a responsive UI with Tailwind CSS optimizing performance and accessibility across desktop and mobile devices
- Developed an expense tracker with React and local storage supporting CRUD operations to manage users expenses
- Integrated Chart.js to provide real-time, interactive visualizations of spending patterns by category

Viaje de Encuentros | JavaScript, React, Bootstrap github.com/Elijah647/Viaje-de-Encuentros

- Designed a responsive UI with Tailwind CSS optimizing performance and accessibility across desktop and mobile devices
- Developed an expense tracker with React and local storage supporting CRUD operations to manage users expenses
- Integrated Chart.js to provide real-time, interactive visualizations of spending patterns by category

Experience
